## Top 100 Economists (5 years or less)

Taken from a pool of 4196 economists whose first publication of any kind is 5 or fewer years ago. These rankings consider only the youngest economists registered with RePEc. Young is defined by the year of the first publication in any form. Note that the shorter the time span considered, the more likely the ranking is going to be spurious.

| Rank | Year | Author                                                                                                                                                                                                                                                                                                    | Score |
